

Feedback Form

6 October to 15 November 2026

Project overview

Morven Offshore Wind Limited ("MvOWL") is developing the Morven Hawthorn Pit Grid Connection ("MHPGC") Project to connect either the Morven North or Morven South Offshore Wind Array Project to the National Grid at Hawthorn Pit.

The MHPGC Project comprises an offshore export cable corridor in both Scottish and English waters and onshore infrastructure in England, near Seaham, County Durham.

This consultation relates to the MHPGC Project as a whole.

The elements of the MHPGC Project in England and English waters will form part of the proposed application for development consent under the Planning Act 2008. The offshore export cable in Scottish waters will be consented separately through the Scottish marine licensing process.

Feedback received through our previous consultations in 2024 and 2025, alongside further technical and environmental assessment, has helped refine the proposals being presented in 2026. We are now seeking further feedback on the MHPGC Project before the relevant applications for consent are finalised.

The consultation

This consultation is open from 6 October to 15 November 2026.

Your feedback will help us refine our proposals before we submit our applications for consent.

Once the consultation has closed, we will carefully consider all feedback received as we continue to refine our proposals. We will publish this feedback and our response in a Consultation Report, which will form part of the DCO application that we will submit to the Planning Inspectorate and Marine Licence application(s) that we will submit to Marine Directorate: Licensing Operations Team.

Find out more

To learn more about the project, visit our website to view all the consultation materials, including:

- Consultation brochure
- Feedback form
- Statement of Community Consultation (SoCC)
- Preliminary Environmental Information Report (PEIR)
- Non-technical summary of the PEIR
- Interactive project map

How to respond

Please complete this feedback form and return it using our freepost address:

FREEPOST MORVEN. Simply include your response form in an envelope with the freepost address and put it in your local post box. There is no need to use a stamp.

You can also submit your feedback in the following ways:

-  **Online:** complete this feedback form online at <https://www.morvenoffshorewind.com/morven-hawthorn-pit-grid-connection/>
-  **Email:** send your responses to info@morvenoffshorewind.com
-  Hand in a copy of this feedback form at a consultation event.

Accessibility and further information

Should you have any questions or require any of our materials in an alternative format, please email info@morvenoffshorewind.com or call 0800 669 6110.

Feedback form

Please use this feedback form to submit your response to our consultation. All questions are optional.

Offshore cable corridor

Do you have any feedback on our refined offshore export cable corridor?

Your response

Cable Landfall

Do you have any feedback on our refined Central landfall location?

This is the area where the offshore export cables come onshore, and the transitional area between the offshore cabling and the onshore cabling, including transition joint bays.

We are particularly interested in understanding your views on:

- the proposed landfall location;
- all activities associated with landfall throughout the MHPGC Project lifecycle, including construction, operation and maintenance and decommissioning;
- the findings of the PEIR, including the predicted environmental effects and assessment outcomes; and
- the proposed measures to avoid, reduce and mitigate environmental effects.

Your response

Onshore corridor

Do you have any feedback on the proposed onshore cable corridor (which includes the onshore export cable corridor and AC connection cable corridor)?

We are particularly interested in understanding your views on:

- the proposed onshore cable corridor route, including:
 - the onshore export cable corridor, and
 - the AC connection cable corridor;
- all activities associated with the onshore export cable corridor and AC connection cable corridor throughout the MHPGC Project lifecycle, including construction, operation and maintenance and decommissioning;
- the findings of the PEIR, including the predicted environmental effects and assessment outcomes; and
- the proposed measures to avoid, reduce and mitigate the environmental effects of the onshore cable route.

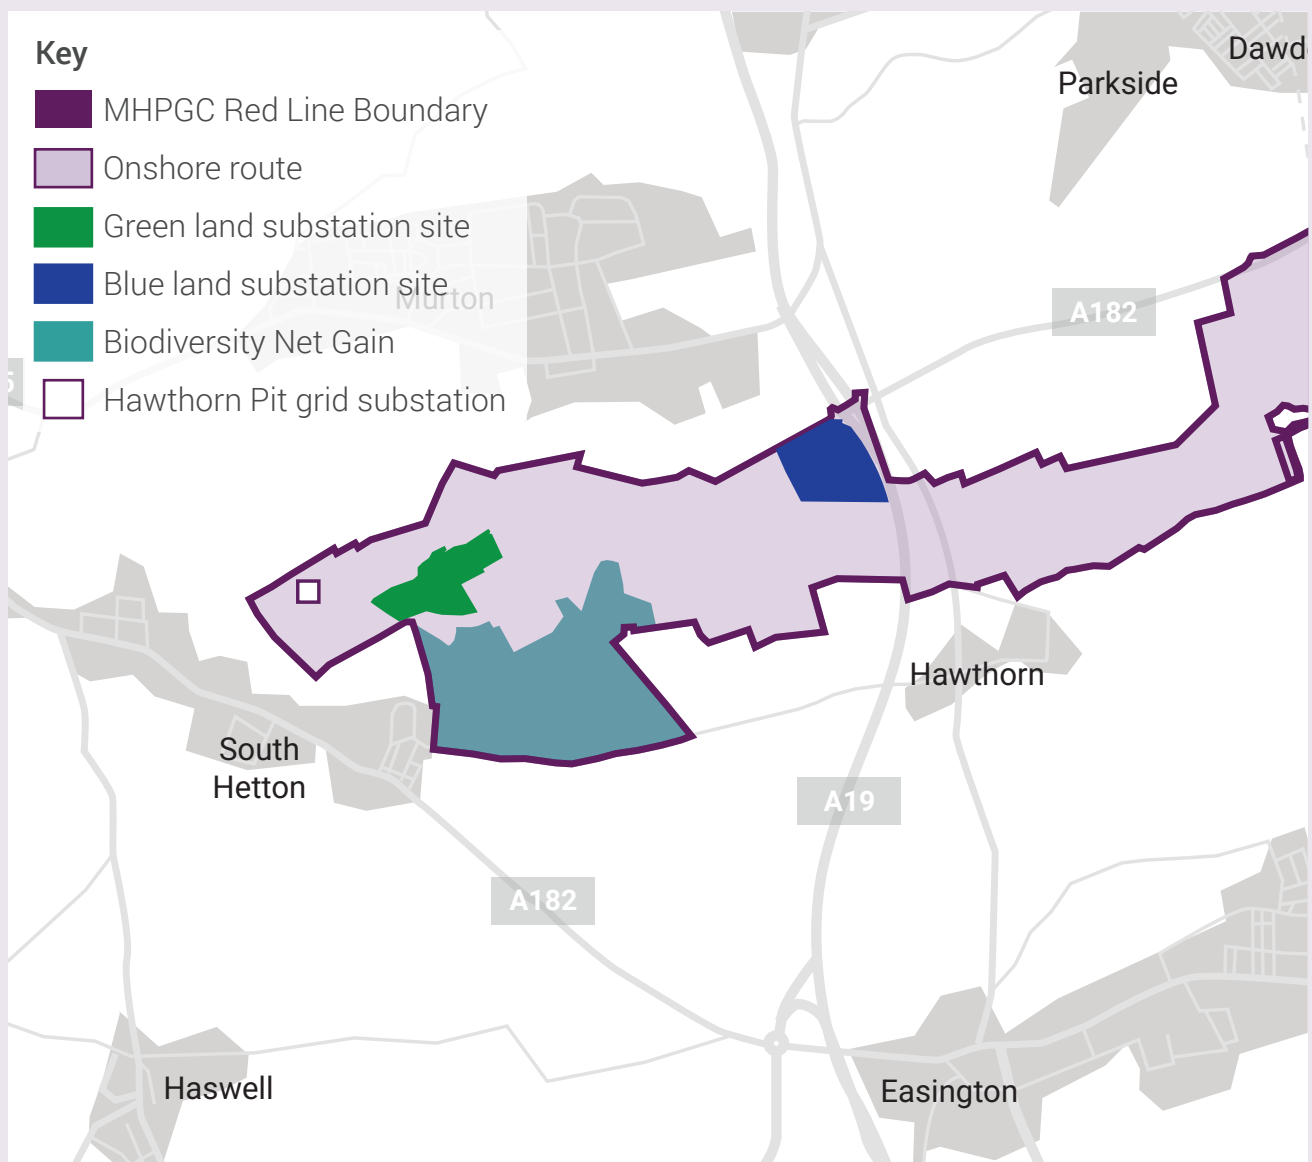

Your response

Onshore land substation

We have identified two refined sites for the location of our land substation. The substation would be sited within one of these search areas.

We are particularly interested in understanding your views on:

- the siting of the onshore land substation (LSS);
- views on or local insights into either the green or blue site options;
- all activities associated with the land substation site throughout the MHPGC Project lifecycle, including construction, operation and maintenance and decommissioning;
- the findings of the PEIR, including the predicted environmental effects and assessment outcomes; and
- the proposed measures to avoid, reduce and mitigate the environmental effects of the LSS.

Onshore land substation (continued)

Do you have any feedback on the 'Blue' substation option - adjacent to the A19?

Your response

Do you have any feedback on the 'Green' substation option – at Jade Business Park?

Your response

Minimising the potential project impacts

Do you have any comments on how we propose to minimise the potential onshore and offshore impacts and effects?

We are particularly interested in understanding your views on:

- biodiversity net gain enhancements;
- proposed measures to avoid, reduce or mitigate any environmental effects; and
- considerations to ensure communities are not adversely affected.

Your response

Any other feedback

Local knowledge is very important for when we finalise our plans. Is there anything you would like to make us aware of?

Your response

How we will use your personal information

All personal information received as part of this consultation will be handled in accordance with our privacy policy which can be found at www.morvenoffshorewind.com/privacy-policy/.

If you are responding to the consultation on behalf of someone else, please ensure that you have their consent to provide this information.
